Dear Valued Member,

COVID-19 EMPLOYMENT SURVEY: FIRM'S PERSPECTIVES ON UNEMPLOYMENT

As an employer, our country needs your help.

Youth employment matters to us all. It matters to the future of our businesses and South Africa. Yet there are surprisingly few studies which investigate unemployment from the private sector's perspective. As the country's employers, we need your help with a short survey about youth employment during COVID-19.

Your input will be used to change employment programmes, inform government and aid our country in a faster recovery.

This survey will have direct effects on the YES programme and is of interest to parties in multiple private and public labour spaces.

Address youth unemployment in South Africa by helping us better understand the private sector's perspective.

Below, please find the link to the survey :
